

See below a list of our Woven Cryptons that can be cleaned with a 90% water 10% Clorox bleach solution always followed by a thorough rinsing with a 100% water solution.

Any 100% polyester Crypton will safely withstand such cleaning, and there will not be any color loss after allowing the mixture to remain on the surface for the required 10-minute dwell time. Simply rinse the solution after cleaning using standard extraction equipment.

It is very important that anyone who uses the bleach solution adhere to these steps in order to prolong the life of the material. For more information go to <http://www.cryptoncare.com/bleachcleanable>.
